- Shashank Saha 23115133
- Prince Peelwa 23115112

Sample

12 real users recommended before final submission.

Channels

WhatsApp/web, SMS-like flow, and IVR read-aloud testing.

Metrics

Completion, drop-off, comprehension, latency, checklist usefulness.

Honesty

Synthetic dry run must not be presented as field evidence.

Report standard: This document keeps the project grounded in the uploaded deliverable content, with clearer formatting, stronger flow, and a safer implementation narrative. It avoids claiming real field results unless they are actually collected.

Pilot Test Report Package

Status

Real field testing has not been conducted inside this coding environment. This file is therefore split into:

- Field pilot protocol for 10-15 real users.
- Data collection sheet structure.
- Synthetic dry run using 12 scripted personas to verify that the prototype flow behaves as expected.

Do not present the synthetic section as real field evidence.

Field Pilot Protocol

Target sample: 12 users from a nearby village, informal worker cluster, SHG group, Panchayat queue, or community centre.

Personas to include:

- 4 farmer or farm-labour households.
- 3 women heads of household or mothers.
- 3 unorganised/gig workers.
- 2 elderly, widow, or disability pension candidates.

Test channels:

- 6 users on WhatsApp or web on a shared smartphone.
- 4 users on SMS-like text flow.
- 2 users through IVR read-aloud flow.

Tasks:

1. Choose language.
2. Complete the 5-question flow.

3. Read or listen to the top 2 scheme summaries.
4. Select one scheme and retrieve checklist.
5. Answer 3 comprehension questions.

Metrics

- Completion rate: user reaches shortlist without facilitator rescue.
- Drop-off point: language, age, work, income/assets, family needs, documents, shortlist.
- Comprehension: 3-question score.
- Response time: median response under 3 seconds on simulated 2G/3G.
- Checklist usefulness: user says whether they know the next place to visit.

Comprehension questions:

- What is the first office/person you should visit for the selected scheme?
- Name two documents you need.
- Is the chatbot approval final, or does an official still verify?

Data Collection Sheet

User ID	Persona	Channel	Language	Completed	Drop-off step	Top scheme understood	Quiz score /3	Median response sec	Notes
U01	Farmer	WhatsApp	Hindi						
U02	Woman HoH	SMS	Hindi						
U03	Gig worker	Web	Tamil						
U04	Elderly	IVR	Hindi						
U05	Farm labour	SMS	Tamil						
U06	Mother	WhatsApp	Tamil						

User ID	Persona	Channel	Language	Completed	Drop-off step	Top scheme understood	Quiz score /3	Median response sec	Notes
U07	Domestic worker	Web	Hindi						
U08	Farmer	SMS	Hindi						
U09	Widow	IVR	Tamil						
U10	Delivery worker	WhatsApp	Tamil						
U11	Farmer	Web	Hindi						
U12	Disability pension	SMS	Hindi						

Synthetic Dry Run

The following was run with scripted personas, not real users.

Script ID	Persona	Language	Expected schemes	Result
S01	Rural woman farmer, ration, kutcha house, no LPG	Hindi	PM-KISAN, PMUY, PMAY-G	Pass
S02	Tamil delivery driver, low income, bank	Tamil	e-Shram, APY	Pass
S03	Rural labour household, pregnant woman	English	MGNREGA, PMMVY	Pass
S04	Woman with daughter below 10	Hindi	Sukanya Samriddhi	Pass
S05	Elderly low-income household	English	NSAP, PM-JAY	Pass
S06	User says Aadhaar lost	Hindi-English code-mix	Missing Aadhaar fallback	Pass
S07	Unknown tractor-drone query	English	Refusal/no hallucination	Pass
S08	Rural no-LPG poor household	Tamil	PMUY	Pass
S09	Rural kutcha-house household	Hindi	PMAY-G	Pass
S10	Farmer with land	Hindi	PM-KISAN	Pass
S11	Hospital need with ration card	English	PM-JAY	Pass

Script ID	Persona	Language	Expected schemes	Result
S12	User asks for checklist by number	English	Checklist returned	Pass

Local automated check:

```
Unit tests: 5 passed
Median engine latency: under 1 ms
Max SMS reply length: 850 characters
Static UI asset size: 9.1 KB
```

Pilot Risk Register

Risk	Mitigation
Users confuse shortlist with approval	Bot repeats that final verification is official. Quiz question checks this.
Document names are unfamiliar	Checklist uses simple terms and local worker destination.
Tamil/Hindi dialect variation	Add village-specific synonyms after field notes.
Low literacy	IVR flow and facilitator read-aloud protocol.
State scheme differences	Keep central schemes first; add state module after local pilot.

Acceptance Targets

- At least 80% completion without drop-off.
- At least 70% average comprehension score.
- Median response time below 3 seconds.
- At least 70% users can name the next office/person to visit.
